Business Requirements Document

PW — Business Partner Recognition & Verification Platform (NFT / Blockchain)

VERSION # 2.1

Nguyễn Đoàn Hồng Nhung

PROJECT DETAILS

ITEM	DETAILS
PROJECT NAME	PW — Business Partner Recognition & Verification Platform (NFT / Blockchain)
DOCUMENT #	PW-BRD-001
CREATOR	Nguyễn Đoàn Hồng Nhung
DATE	16 Oct 2026
VERSION #	2.1

1. EXECUTIVE SUMMARY SNAPSHOT

PW is an international platform that uses NFT / Blockchain to recognize and verify business titles and partnership relationships, combining traditional e-commerce with Web3 to create transparency and prevent information tampering. PW acts as the issuing authority: it turns an act of recognition into an immutable, on-chain NFT that any third party can verify through a Public Directory. Businesses and individuals can purchase a title (Title → Distinction NFT) or be granted one by PW (Award → Award NFT). The system automatically distributes reward points, ranks accounts by the number of NFTs owned, and supports on-chain authenticity verification (Valid / Revoked / Invalid).

2. PROJECT DESCRIPTION

Today, business-partner recognition relies mainly on word of mouth, manual paperwork, or press articles — lacking publicly verifiable evidence, with no durable storage, and easily forged or manipulated. This erodes trust in international business relationships and diminishes the honor value of genuine partners.

PW addresses this by issuing blockchain-backed digital titles. After registering and completing KYC, a business or individual can purchase a Title (Philanthropist, Investor, Bridge) — the system mints a Distinction NFT; or be granted an Award by PW — the system mints a soulbound Award NFT. NFTs are held in a custodial wallet (created on-demand via Circle) and can be moved to a non-custodial wallet. All titles appear publicly in the Public Directory and can be verified on-chain, forming a transparent, durable, tamper-proof layer of proof.

3. PROJECT SCOPE

Estimated development time: 8 weeks (of which 4–5 weeks focus on business analysis and BA deliverables). The platform is delivered as a web/SaaS application and uses third-party Web3 services (Circle for custodial wallets, Alchemy for on-chain interaction).

The project team is structured as follows: 01 PM, 01 BA, 1 UI/UX, 2 APP, 2 BE, 1 Tester

The project is estimated to take approximately 2 months (8 weeks) [BA proposal]:

-Planning and analysis: Week 1–3 (BRD, BPMN and business rules; BA deliverables continue until Week 5).

-Design: Week 3–4 (UI/UX screens and design review).

-Development: Week 4–7 (web app, admin portal, Circle / Alchemy / Payment Gateway integration).

-Testing: Week 6–8 (UAT, fixes, security check).

-Deployment: Week 8 (go-live and handover).

Expected costs:

- Personnel: 42 person-weeks (PM 8, BA 8, UI/UX 4, APP 8, BE 10, Tester 4), about 9.7 person-months.

Cost estimate: about USD 12,000 for personnel (illustrative: USD 1,200 per person-month, all-in; the Business / Finance sets the real rate) [BA proposal]. Third-party and running costs (Circle, Alchemy, Payment Gateway fees, hosting) are TBD — a quote is needed from each provider (owner: Finance / PM, by the end of Week 2).

IN-SCOPE ITEMS	OUT-OF-SCOPE ITEMS
Item 1: Landing Page (Waitlist) & onboarding: Register Account, Submit KYC, Classify Business (Class 0–7 by headcount).	Item 1: Directly deploying source code and operating blockchain nodes (Alchemy is used instead).
Item 2: Wallet management: Create Custodial Wallet (on-demand via Circle), View Wallet, View Owned NFTs, Link / Unlink Non-custodial Wallet (message signing), Transfer NFT to a Non-custodial Wallet.	Item 2: End-user training.
Item 3: Title & NFT: Browse Titles, Purchase / Gift Title → Distinction NFT, Transfer Distinction NFT (once, to the member's own non-custodial wallet).	Item 3: Building custom wallet/node/KYC infrastructure (third-party services used: Circle, Alchemy).
Item 4: Points/Pricing/Discount: View Pricing by Class, Calculate Price, Apply Discount, Earn/Use Points.	Item 4: Transferring an NFT to another owner, and any marketplace or resale of NFTs in this version [BA proposal].
Item 5: Admin Portal: Review KYC, Grant Award → Award NFT, Manually Adjust Points, Revoke NFT, View Audit Logs.	Item 5: Transferring or selling an Award NFT. Awards are soulbound by design and stay with the recognized entity (BR-06).
Item 6: Public Directory + automatic Ranking + Verify NFT On-chain (Valid/Revoked/Invalid).	Item 6: Payment methods other than card payment through the Payment Gateway [BA proposal].
Item 7: AI Assistant: Q&A, NFT lookup, platform guidance, Title/business recommendations.	

4. BUSINESS DRIVERS

Business Driver 1: Trust & transparency

Reliable, publicly verifiable partner recognition, replacing forgeable word-of-mouth and paper certificates.

Pain point today: verifying a partnership means calling or e-mailing Partner A; BA estimate: 1–3 days per check.

Measurable goal: a third party verifies a title in the Public Directory in under 5 seconds, without contacting Partner A.

Business Driver 2: Anti-forgery (immutable)

On-chain NFTs cannot be altered or faked, raising the honor value of genuine partners. Blockchain / Web3 (Circle, Alchemy) is the technical means.

Pain point today: paper certificates and press articles can be copied or edited.

Measurable goal: 100% of issued titles are minted on-chain; a revoked title shows as Revoked within 1 minute.

Business Driver 3: Durable collaboration

A long-term, searchable record of recognition that increases trust in international business relationships.

Pain point today: records are kept locally by each party, so the history is hard to trace.

Measurable goal: every issued title appears on the public profile within 5 minutes and stays searchable.

Business Driver 4: Revenue & loyalty

Monetization via Class-based Title sales, plus reward points and a Year-2 discount to retain customers.

Pain point today: recognition is not monetized.

Measurable goal: sell 200 Titles within 6 months of launch (BA proposal).

5. PRESENT PROCESS (AS-IS)

As-is: Partner recognition is handled manually — verbal agreements, paper certificates/letters, or press articles. There is no centralized, durable repository; third parties have no way to verify authenticity; certificates are easily copied, edited, or forged. Result: low trust, difficulty tracing collaboration history, and reduced honor value.

6. PROPOSED PROCESS (TO-BE)

To-be:

(1a) Before launch, a visitor joins the Waitlist on the Landing Page (diagram D0). A duplicate e-mail is answered with an 'already registered' message.

(1b) After launch: register → submit KYC → the Admin reviews (approve, or reject with a reason; a rejected member can re-submit, BR-09) → (if a business) classify Class 0–7 → activate the account (D1).

(2) Purchase / Gift a Title (D2): browse → choose recipient (self / other; the recipient must be KYC-verified) → calculate price + discount/points → payment (Payment Gateway) → check wallet (create via Circle if missing) → mint Distinction NFT and assign it to the recipient (active) → distribute points 10/10/10 → update Ranking + Audit. If the payment fails, nothing is charged and the buyer can retry (BR-10). If the payment succeeds but minting fails, a full refund request is sent to the Payment Gateway, and the Admin is notified if the refund fails (BR-11, BR-12).

(3) PW grants an Award (D3) → soulbound Award NFT assigned to the recipient (active), 0 points; the recipient must be KYC-verified, otherwise the grant is rejected.

(4) Transfer a Distinction NFT (D4.2) at most once, and only to the member's own non-custodial wallet: a linked wallet (no re-signing) or a new own wallet that is first verified by connect & sign (D4.1). Transferring to another owner is not supported (BR-06).

(5) The Admin revokes an NFT (D5) → status becomes Revoked and the ranking is recomputed.

(6) A Public User browses the Directory and verifies an NFT on-chain (D6) → Valid / Revoked / Invalid.

(7) A member links a non-custodial wallet from the Member Dashboard (connect wallet → sign message, D4.1) — see Appendix "Wallet linking & transfer rules".

(8) A user asks the AI Assistant (D7.2) about the platform, looks up an NFT or asks for a Title recommendation by purpose. The answers come only from the knowledge base that PW maintains (D7.1); the assistant gives no investment, legal or tax advice (FR-030).

BPMN diagrams (file 03.PW_BPMN_TO-BE.pdf): D0 Join Waitlist, D1 Onboarding & Classification, D2 Purchase / Gift, D3 Grant Award, D4.1 Link Wallet, D4.2 Transfer NFT to own wallet, D5 Revoke, D6 Public Directory, D7.1 Update the Knowledge Base, D7.2 AI Assistant. The As-Is process is drawn in 02.PW_BPMN_AS_IS.pdf.

7. FUNCTIONAL REQUIREMENTS

PRIORITY

VALUE	STATUS	DESCRIPTION
1	Immediate	The requirement is critical to the project’s success. Without fulfilling this requirement, the project is not possible.
2	High	The requirement is high priority re the project's success, but the project could still be implemented in a minimum viable product (MVP) scenario.
3	Moderate	The requirement is important to the project’s success, as it provides value, but the project could still be implemented in an MVP scenario.
4	Low	The requirement is of low priority, but the project’s success is not dependent upon it.
5	Prospective	The requirement is out of the project’s scope and is included as a possible component of a prospective release and/or feature.

ID	REQUIREMENT	PRIORITY	RAISED BY
FR-001	Join Waitlist on the Landing Page Acceptance: a valid e-mail is required. New e-mail: saved and confirmed. Duplicate: 'already registered' message, no second entry.	High	End User, PO
FR-002	Register Account (Company / Individual) Acceptance: Company or Individual; fields: name, representative (Company), e-mail (unique), country, headcount (Company), password. Success: status 'Not yet KYC', user signed in and sent to the KYC form.	Immediate	End User, PO
FR-003	Submit KYC Acceptance: a member with KYC 'Not yet KYC' or 'Rejected' picks a document type (Company: Articles of Incorporation / Certificate of Good Standing / Business Registration Extract; Individual: Passport / National ID Card / Driver's Licence), enters the document number and uploads at least one file (PDF, JPG or PNG, up to 25 MB). Result: status 'In Review'; purchasing stays locked until Approved. A rejected member can re-submit (BR-09).	Immediate	Compliance, PO
FR-004	Admin Review & Approve/Reject KYC Acceptance: the Admin approves (and may correct the Class) → 'Approved', member notified, entity listed in the Directory; or rejects with a required reason → 'Rejected' (BR-09). Each decision is logged (KYC_APPROVE / KYC_REJECT).	Immediate	Admin, Compliance
FR-005	Classify Business into Class 0–7 by headcount Acceptance: headcount → Class: 1–10 → 0; 11–50 → 1; 51–200 → 2; 201–500 → 3; 501–1,000 → 4; 1,001–5,000 → 5; 5,001–9,999 → 6; 10,000+ → 7. An Individual is Class 0. The Admin can correct the Class (BR-01).	High	PO, Business
FR-006	Log In / user authentication Acceptance: valid e-mail + password → Dashboard (Admin → Admin Portal). A wrong login shows one generic error. A member without approved KYC can sign in but cannot purchase.	Immediate	End User
FR-007	Create Custodial Wallet on-demand (via Circle) Acceptance: when a member receives an NFT and has no PW wallet, one is created through Circle automatically. If Circle fails, it is handled as a mint failure (BR-11).	Immediate	PO
FR-008	View Wallet	Moderate	End User

ID	REQUIREMENT	PRIORITY	RAISED BY
	Acceptance: shows the PW wallet address and the linked wallets (name, address, date); an empty state when there are none.		
FR-009	View Owned NFTs Acceptance: lists each NFT with name, ID, issue date, location (PW wallet / linked wallet), status (Active / Revoked) and custody status. NFTs in an unlinked wallet are not listed (BR-05).	High	End User
FR-010	Transfer a Distinction NFT to the member's own non-custodial wallet (a linked wallet, or a new own wallet verified by connect & sign) Rules: BR-06, BR-07. Acceptance: only a Distinction NFT in the PW wallet can be transferred, and only once: to a linked wallet (no re-signing) or to a new own wallet verified by connect & sign. After the on-chain confirmation the NFT shows as Self-custody (verified) and is locked in that wallet. A second transfer of the same NFT, a transfer of an Award NFT (soulbound) and a transfer to an address that does not match the signing wallet are rejected with a clear error.	High	End User
FR-011	Browse Titles and view pricing by Class (Philanthropist / Investor / Bridge) Acceptance: shows the three Titles with a description and the price for the member's own Class (Individual = Class 0), in CHF (BR-01); a guest is asked to log in to see prices.	High	End User
FR-012	Purchase / Gift Title (buyer may differ from recipient) Rules: BR-08, BR-10, BR-11. Acceptance: the buyer (and a gift recipient) must be KYC-approved. The buyer picks a card, reviews the price breakdown and confirms. Success: NFT issued, result screen shown, recipient notified.	Immediate	End User, PO
FR-013	Mint Distinction NFT on purchase (system, via Blockchain) Rules: BR-11, BR-12. Acceptance: after payment a unique NFT is minted to the recipient's wallet (Active) and its ID is shown. A mint failure cancels the order and starts a full refund request (FR-035).	Immediate	PO
FR-016	Calculate Price by Class Acceptance: price = list price – Year-2 discount (BR-02) – points used (BR-04). The breakdown is shown before payment; the total is never below 0.	Immediate	PO

ID	REQUIREMENT	PRIORITY	RAISED BY
FR-017	Apply 20% Discount from Year 2 (time + point-balance eligibility) Rule: BR-02. Acceptance: when the member is eligible, the 20% discount appears in the price breakdown; when not, the screen says what is missing (time or points).	High	PO, Business
FR-018	Distribute points 10% buyer / 10% recipient / 10% system on paid transactions Rule: BR-03. Acceptance: after a successful mint the points are added and appear in the point history; if buyer = recipient the buyer earns 10% once; no points for an Award or a failed order.	Immediate	PO, Finance
FR-019	View Point Balance Acceptance: the Dashboard shows the balance and a history (date, amount, reason) that adds up to the balance.	Moderate	End User
FR-020	Deduct / Use Points Rule: BR-04. Acceptance: points up to the balance and the Title price after the Year-2 discount; deducted only after payment succeeds.	Moderate	End User, PO
FR-021	Browse Public Directory Acceptance: no login. A list of KYC-approved entities (name, jurisdiction, NFT count, rank); search by name, jurisdiction or Title ID; sort by ranking or name.	High	Public User, PO
FR-022	View Company / Profile Acceptance: a public profile with name, jurisdiction, registry number, 'KYC verified' label, rank and NFT count; the link can be shared.	High	Public User
FR-023	View Profile NFTs Acceptance: the profile lists Titles and Awards (name, ID, issue date, status); a revoked NFT shows as Revoked and leaves the rank.	High	Public User
FR-024	Verify NFT On-chain (Valid / Revoked / Invalid) Acceptance: no login. Returns Valid (exists, owned by the holder, not revoked), Revoked, or Invalid (not found or mismatch) within the time in NFR-005.	Immediate	Public User, PO
FR-025	Calculate Ranking by total NFTs owned (only NFTs in the custodial wallet or a verified linked wallet count) Rule: BR-05. Acceptance: the rank is recomputed after a purchase, gift, Award, revoke, unlink or an NFT leaving a linked wallet; ties list registered members first.	Moderate	PO

ID	REQUIREMENT	PRIORITY	RAISED BY
FR-026	Grant Award → Award NFT (soulbound) Rule: BR-08. Acceptance: the Admin picks a KYC-approved recipient and an Award type; an unverified recipient is rejected with 'KYC not verified'. Success: soulbound Award NFT minted, 0 points (BR-03), rank updated, recipient notified, action logged.	High	Admin, PO
FR-027	Revoke NFT (Admin only) Rule: BR-13. Acceptance: the Admin picks an NFT and gives a reason (required). Status becomes Revoked on-chain and in PW, rank recomputed, action logged. If the on-chain update fails, the status does not change.	High	Admin, Compliance
FR-028	Manually Adjust Points (Admin, exception handling) Acceptance: the Admin picks a member, add or subtract, an amount and a reason (required). The balance cannot go below 0; the change appears in the point history and the Audit Log.	Moderate	Admin
FR-029	View Audit Logs Acceptance: a read-only list (time, signer, action, target, reason, hash); filter by action, signer and date; no edit or delete.	High	Admin, Compliance
FR-030	Interact with AI Assistant (Q&A, NFT lookup, guidance, Title recommendations by purpose; no investment advice) Acceptance: answers from the platform documentation; looks up the member's own NFTs and public entity data; suggests a Title by purpose; politely refuses investment, legal and tax advice; says so when no data is found.	Moderate	End User, PO
FR-031	Link Non-custodial Wallet on the Member Dashboard (connect wallet + sign message; a wallet already linked to another account is rejected) Rule: BR-07. Acceptance: the member connects a wallet and signs a message; the wallet is added to the Linked wallets list. A wallet that is already linked to another account cannot be linked.	High	End User, PO
FR-032	Unlink Wallet (warning; NFTs in that wallet are removed from ranking) Rule: BR-07. Acceptance: a warning is shown before unlinking; after confirmation the wallet leaves the list and its NFTs no longer appear in the member's NFT list or count toward ranking.	Moderate	End User
FR-033	Update NFT custody status from Custodial to Self-custody (verified) on on-chain confirmation	High	PO

ID	REQUIREMENT	PRIORITY	RAISED BY
	Rule: BR-06. Acceptance: until the on-chain confirmation the NFT shows as pending; after it the NFT status in the NFT list is Self-custody (verified).		
FR-034	Periodically check linked wallets on-chain; remove NFTs that leave a linked wallet from ranking Acceptance: at the check frequency (TBD, see Appendix) each linked wallet is compared with the chain; an NFT that has left a linked wallet is removed from ranking and the change is logged.	Moderate	PO, Compliance
FR-035	Refund a paid purchase when minting fails: send a refund request for the full amount to the Payment Gateway, notify the buyer, log the result, and notify the Admin if the refund request fails (rules BR-11, BR-12) Acceptance: a full refund request is sent to the Payment Gateway, the buyer is notified and the result is logged; if the refund request fails, the Admin is notified.	Immediate	PO, Finance

Note: FR-014 and FR-015 were merged into FR-010 and FR-011; their IDs are not reused.

7A. BUSINESS RULES

The business rules below are referenced by the functional requirements (for example FR-020 follows BR-04). Rules marked "BA proposal" are proposed by the BA and need confirmation by the Business.

ID	RULE	SOURCE / STATUS
BR-01	Pricing by Class. The price of a Title follows the buyer's Class (0–7, by headcount; an Individual is Class 0). Philanthropist / Bridge / Investor in CHF: Class 0: 1,000 / 1,500 / 2,000; Class 1: 1,500 / 2,000 / 3,000; Class 2: 2,000 / 3,000 / 4,000; Class 3: 3,000 / 4,500 / 6,000; Class 4: 4,500 / 6,500 / 9,000; Class 5: 6,500 / 9,500 / 13,000; Class 6: 9,000 / 13,000 / 18,000; Class 7: 12,000 / 18,000 / 25,000.	Decided (Appendix)
BR-02	Year-2 discount. 20% off the list price when the member has been active for 2 years since KYC approval AND holds at least 1,000 points.	2 years: decided. 1,000 points: BA proposal, the Business to confirm
BR-03	Points earned. On a paid purchase: 10% of the amount paid to the buyer, 10% to the recipient and 10% to the system; if buyer = recipient the buyer earns 10%. 1 CHF = 1 point, rounded up. An Award earns 0 points. Points are distributed only after the NFT is minted successfully.	Decided

ID	RULE	SOURCE / STATUS
BR-04	Point redemption. 1 point reduces the total by CHF 1, up to the member's balance and the Title price after the Year-2 discount. The Year-2 discount (BR-02) is applied first.	Decided
BR-05	Ranking. Every NFT held counts equally (Award = Distinction). An NFT counts only while held in the PW custodial wallet or in a verified linked wallet. The rank is recomputed on purchase, gift, Award, revoke, unlink and when an NFT leaves a linked wallet. Ties list registered members first.	Decided
BR-06	NFT transfer. A Distinction NFT can be transferred at most once, and only from the PW custodial wallet to the member's own non-custodial wallet (a linked wallet, or a new wallet verified by connect & sign). After the on-chain confirmation the NFT is locked in that wallet. An Award NFT is soulbound and cannot be transferred. Transfer to another owner is not allowed.	Decided
BR-07	Wallet linking. A wallet is linked by connecting it and signing a message (no gas fee). A wallet that is already linked to one account cannot be linked to another account. Unlinking shows a warning; the NFTs in that wallet are then removed from ranking.	Decided
BR-08	Purchase, gift and Award eligibility. Only a member with approved KYC can buy a Title; a gift recipient and an Award recipient must also be KYC-approved. There is no decline step: the Title is issued to the recipient's wallet immediately and the recipient is notified.	Decided
BR-09	KYC rejection. If the Admin rejects a KYC submission, the account stays 'Rejected', the reason is shown to the applicant and the applicant can re-submit without limit. A rejected account cannot purchase, receive a gift or receive an Award.	Decided
BR-10	Payment failure. If the Payment Gateway declines or fails the payment, no money is taken, no NFT is minted and no points are given; the buyer is told the reason and can retry.	BA proposal
BR-11	Mint failure after payment. If the payment succeeded but minting fails, the order is cancelled and a full refund is requested (BR-12). There is no automatic retry in this version. No points are distributed.	BA proposal
BR-12	Refund. The system sends a refund request for the full amount to the Payment Gateway immediately, notifies the buyer and writes an Audit Log entry. If the refund request fails, the Admin is notified to refund manually. The money returns to the buyer's original card; the card issuer usually takes 5–10 business days to show it (not a PW commitment).	BA proposal; Finance to confirm

ID	RULE	SOURCE / STATUS
BR-13	Revoke. Only an Admin can revoke an NFT, with a reason. The NFT status becomes Revoked on-chain and in PW, the rank is recomputed and the action is logged.	Decided

8. NON-FUNCTIONAL REQUIREMENTS

ID	REQUIREMENT	CATEGORY
NFR-001	The AI Assistant responds within 2–5 seconds under normal operating conditions.	Performance
NFR-002	Every write action (KYC decision, mint, transfer, revoke, points change, wallet link) is logged with time, signer, action, target and reason; logs cannot be edited or deleted.	Auditability
NFR-003	Admin sign-in uses two-factor authentication; passwords are stored hashed; all traffic uses HTTPS; PW never holds users' private keys; custodial wallets are managed only through the Circle API.	Security
NFR-004	Directory and profile pages load within 3 seconds for 95% of requests; a newly issued Title appears on the public profile within 5 minutes; a mint or transfer shows 'pending' at once and a final result within 60 seconds; calls to Circle, Alchemy and the Payment Gateway time out after 30 seconds with a clear error.	Performance
NFR-005	The verification result matches the on-chain state in 100% of test cases and returns within 5 seconds; a revoked NFT shows as Revoked within 1 minute; an NFT's owner and status change only through the defined flows.	Data integrity
NFR-006	Supports 10,000 member accounts and 200 concurrent users in the first year without slower responses.	Scalability
NFR-007	Uptime of at least 99.5% per month, excluding scheduled maintenance announced at least 48 hours ahead.	Availability
NFR-008	KYC documents are encrypted in transit and at rest and visible only to the Admin and Compliance roles; personal data is deleted within 30 days of a valid request unless the law requires keeping it (applicable law to be confirmed with Compliance).	Compliance / Data protection
NFR-009	English interface for screens from 360 px to 1920 px wide; a new member can register and submit KYC within 10 minutes; at least 90% of UAT testers finish the main flows (register, KYC, buy a Title, verify an NFT) without help.	Usability

ID	REQUIREMENT	CATEGORY
NFR-010	1 CHF = 1 point, rounded up; price, discount and points match BR-01 to BR-04 in 100% of test cases.	Accuracy

All thresholds above are proposed by the BA and need confirmation by the Business.

9. GLOSSARY

TERM/ABBREVIATION	EXPLANATION
Title	A purchasable honor (Philanthropist, Investor, Bridge).
Distinction NFT	The NFT representing a purchased Title.
Award	A special honor granted by PW (not purchasable).
Award NFT	The NFT representing an Award; soulbound (non-transferable).
NFT	Non-Fungible Token — a unique on-chain digital asset.
KYC	Know Your Customer — identity verification.
Custodial Wallet	A wallet managed by PW/Circle on the user's behalf.
Non-custodial Wallet	A wallet whose keys the user controls.
Circle	Provider of custodial wallet infrastructure via API.
Alchemy	Provider of blockchain node/API for on-chain interaction.
Class 0–7	Eight business tiers by headcount that set pricing.
CHF / Point	Conversion 1 CHF = 1 Point (rounded up).
Soulbound	An NFT permanently bound to its owner; non-transferable.
Public Directory	A public directory to look up and verify NFTs.
Ranking	Automatic ranking by total NFTs owned.
Linked Wallet	A non-custodial wallet whose ownership the user has proven by signing a message; one wallet can be linked to one account only.
Message Signing	Signing a free, off-chain message with a wallet to prove ownership (no transaction, no gas fee).
Self-custody (verified)	NFT status after it is confirmed on-chain in the member's linked wallet; the NFT is locked there and still counts toward ranking.

11. APPENDIX

•Business rules (pricing, discount, points, ranking, transfer, wallet linking, KYC, refund): see section 7A.

•AI Assistant scope — decided: Q&A from the platform documentation, NFT lookup (own NFTs and public entity data), platform guidance and Title recommendations by purpose; no investment, legal or tax advice.

•Minimum holding period value (collusion mitigation) — TBD. Owner: Product Owner with Compliance; deadline: end of Week 3 (before development starts).

•Frequency of the periodic on-chain custody check of linked wallets — TBD. Owner: Tech lead (BE) with Compliance; deadline: end of Week 3.

•Year-2 discount threshold of 1,000 points — proposed by the BA. Owner: Business owner; deadline: end of Week 2.

•Refund wording and processing time — PW submits the refund request immediately after a mint failure; the card issuer usually takes 5–10 business days to show the money. Owner: Finance with the Business owner; deadline: end of Week 3.

•NFR thresholds (uptime, load, response time) — proposed by the BA. Owner: Business owner with Tech lead; deadline: end of Week 3.

•Personnel rate and third-party costs (section 3) — Owner: Finance / PM; deadline: end of Week 2.

Wallet linking & transfer rules

General principles

•Rules: BR-05 (ranking), BR-06 (transfer), BR-07 (wallet linking).

•There is one single list of linked wallets, shared by the Member Dashboard and the Transfer flow.

Flow 1 — Link a wallet on the Member Dashboard

Connect wallet → Sign message → Save to the "Linked wallets" list (unlinking: FR-032, BR-07).

Flow 2 — Transfer to a linked wallet

Select NFT → Select a wallet from the dropdown (or manually enter an address that matches a linked wallet; the system recognises it automatically) → No re-signing required → Submit → Ranking kept.

Flow 3 — Transfer to a new wallet (not yet linked)

Enter address → Connect wallet and sign → Match addresses.

•Match: submit; the wallet is automatically added to the Dashboard; ranking kept.

•No match: show an error; the user reconnects the correct wallet.

After transfer (applies to Flows 2 and 3)

•After the on-chain confirmation, the NFT status and the periodic check follow FR-033 and FR-034.

Residual risk

Collusion (another person signing on the user's behalf) cannot be fully prevented. Mitigations: one wallet per account rule, minimum holding period, anomaly monitoring, and Terms of Service clauses.
