USER STORIES AND ACCEPTANCE CRETERIA MANAGERMENT

Project **TimeApp**
Versio 1.0
Date 5/28/2026
Descri tion Updated more AC from USGN01

No.	ID	Epic	As a/an (role/activitty)	I want (action/activity)	So that (benefit/reason)	User story	Acceptance Creteria	Business Rule	Note
1	**US-01**	USER MANAGEMENT	Employee	to create an account using my email and password,	I can securely store and synchronize my attendance data.	[As a/an] Employee, [I want] to create an account using my email and password, [so that] I can securely store and synchronize my attendance data.	**Scenario 1 — Successful Registration** Given the user is on the registration screen When the user enters valid name, email, password, and confirm password And clicks the "Create Account" button Then the system shall create a new account successfully And redirect the user to the login or home screen **Scenario 2 — Email Already Exists** Given the email is already registered When the user submits the registration form Then the system shall display an error message And prevent account creation **Scenario 3 — Invalid Input** Given the user enters invalid or empty information When the user submits the registration form Then the system shall validate the fields And display corresponding validation messages	The system shall not allow users to register with an email address that already exists in the system.	Notification Permission Requiremen The system shall require notification permission before sending push notifications. Background Notification Support The system shall support notification interaction while the application is running in the background. Notification Retry If a notification fails to send, the system shall retry sending based on system retry policy. Attendance Record Storage The system shall store all attendance records in the database. Timestamp Format All attendance timestamps shall follow the device's local timezone.
2	**US-02**	USER MANAGEMENT	Employee	to log into the app securely,	I can access my attendance reminders and records.	[As a/an] Employee, [I want] to log into the app securely, [so that] I can access my attendance reminders and records.	**Scenario 1 — Successful Login** Given the user has a valid account When the user enters correct email and password And clicks the login button Then the system shall authenticate the user And navigate to the home dashboard **Scenario 2 — Incorrect Credentials** Given the user enters incorrect login credentials When the user attempts to log in Then the system shall display an authentication error message And deny access	Users must log in successfully before accessing attendance features and reports.	Daily Attendance Uniqueness Each user shall have only one attendance record per working day. Data Persistence Attendance history and reports shall remain accessible until deleted by the user or system administrator. HRM Integration Readiness The system architecture shall support future HRM integration. Scalable Notification Engine The notification engine shall support future reminder and scheduling enhancements.
3	**US-03**	USER MANAGEMENT	Employee	to manage my account information,	I can keep my personal settings updated.	[As a/an] Employee, [I want] to manage my account information, [so that] I can keep my personal settings updated.	**Scenario — Update Account Information** Given the user is logged into the application When the user updates account information And saves changes Then the system shall update the profile successfully	The system shall maintain user login sessions until the user logs out.	
4	**US-04**	NOTIFICATION MANAGEMENT	employee	to receive a morning attendance reminder at 9:00 AM,	I do not forget to check in.	[As a/an] employee, [I want] to receive a morning attendance reminder at 9:00 AM, [so that] I do not forget to check in.	**Scenario 1 — Display Morning Reminder** Given the user has enabled notification permission And the user has not checked in today When the system time reaches 9:00 AM Then the system shall send a push notification And the notification shall display: "Have you checked in today?" And the notification shall contain: "Checked In" "Leave / Afternoon Shift" **Scenario 2 — Prevent Duplicate Reminder** Given the user has already checked in for the day When the reminder schedule is triggered again Then the system shall not display another check-in reminder	The system shall send a morning attendance reminder notification at 9:00 AM every working day. The morning reminder notification shall contain the following options: Checked In Leave / Afternoon Shift The system shall not send duplicate morning reminders after the user has completed check-in.	
5	**US-05**	NOTIFICATION MANAGEMENT	employee	the reminder notification to remain visible,	I do not accidentally ignore it.	[As a/an] employee, [I want] the reminder notification to remain visible, [so that] I do not accidentally ignore it.	**Scenario — Notification Persistence** Given the attendance reminder notification is displayed When the user has not interacted with the notification Then the notification shall remain active And the notification shall not disappear automatically	The attendance reminder notification shall remain visible until the user interacts with it.	
	US-06	NOTIFICATION MANAGEMENT	employee	the system to remind me in the evening if I forgot to check in,	I can avoid missing attendance records.	[As a/an] employee, [I want] the system to remind me in the evening if I forgot to check in, [so that] I can avoid missing attendance records.	**Scenario — Trigger Evening Reminder** Given the user has no check-in record before 3:00 PM When the system time reaches 6:00 PM Then the system shall send a check-out reminder notification And the notification shall display: "Have you checked out yet?"		
6	**US-07**	NOTIFICATION MANAGEMENT	employee	to confirm attendance directly from the notification,	I do not need to open the app.	[As a/an] employee, [I want] to confirm attendance directly from the notification, [so that] I do not need to open the app.	**Scenario — Direct Confirmation** Given the attendance notification is displayed When the user taps "Checked In" Then the system shall record the check-in time And the user shall not be required to open the application		
7	**US-08**	CHECK-IN & CHECK-OUT MANAGEMENT	employee	the system to record my check-in time,	my working hours can be calculated automatically.	[As a/an] employee, [I want] the system to record my check-in time, [so that] my working hours can be calculated automatically.	**Scenario — Record Check-in Timestamp** Given the morning attendance notification is displayed When the user selects "Checked In" Then the system shall save the current timestamp as check-in time And the system shall start the working-hour countdown	The system shall record the exact timestamp when the user selects "Checked In".	
8	**US-09**	CHECK-IN & CHECK-OUT MANAGEMENT	employee	the system to calculate my working duration automatically,	I know when my working hours are nearly completed.	[As a/an] employee, [I want] the system to calculate my working duration automatically, [so that] I know when my working hours are nearly completed.	**Scenario 1 — One Hour Remaining Reminder** Given the user checked in at 9:30 AM When 7 working hours have passed Then the system shall send a notification And the notification shall display: "1 hour remaining before completing 8 working hours" **Scenario 2 — 15-Minute Reminder** Given the user checked in successfully When there are 15 minutes remaining before the end of working duration Then the system shall send a check-out reminder And the notification shall contain: "Checked Out"	The system shall automatically start the working-hour countdown immediately after check-in is recorded. The default working duration for a normal working day shall be 8 hours. The system shall allow only one active check-in record per user per day. The system shall send a notification after 7 working hours have passed.	
9	**US-10**	CHECK-IN & CHECK-OUT MANAGEMENT	employee	the system to record my check-out time,	my attendance record is completed.	[As a/an] employee, [I want] the system to record my check-out time, [so that] my attendance record is completed.	**Scenario — Successful Check-out** Given the check-out reminder notification is displayed When the user selects "Checked Out" Then the system shall save the current timestamp as check-out time And the system shall update the attendance record status to completed	The system shall record the exact timestamp when the user selects "Checked Out". The attendance record status shall be updated to "Completed" after successful check-out. Users shall be able to confirm check-out directly from the push notification without opening the application.	
10	**US-11**	LEAVE & SHIFT MANAGEMENT	employee	to select leave or afternoon shift options,	the system can adjust my attendance reminders correctly.	[As a/an] employee, [I want] to select leave or afternoon shift options, [so that] the system can adjust my attendance reminders correctly.	**Scenario 1 — Leave Selection** Given the morning attendance notification is displayed When the user selects "Leave / Afternoon Shift" Then the system shall display: "Full-day Leave" "Afternoon Shift"	If the user selects "Full-day Leave", the system shall stop all attendance reminders for the current day.	
11	**US-12**	LEAVE & SHIFT MANAGEMENT	employee	the system to support afternoon working schedules,	I receive reminders at the correct time.	[As a/an] employee, [I want] the system to support afternoon working schedules, [so that] I receive reminders at the correct time.	**Scenario 1 — Afternoon Shift Reminder** Given the user selected "Afternoon Shift" When the system time reaches 1:00 PM Then the system shall send a new check-in reminder And the working duration shall be set to 4 hours **Scenario 2 — Disable Morning Reminder** Given the user selected "Afternoon Shift" When the selection is confirmed Then the system shall disable further morning reminders for the current day	The working duration for afternoon shift mode shall be 4 hours. The system shall trigger countdown reminders based on the 4-hour working duration for afternoon shift users.	
12	**US-13**	AUTO HANDLING	employee	the system to handle missing attendance automatically,	incomplete attendance data can still be tracked.	[As a/an] employee, [I want] the system to handle missing attendance automatically, [so that] incomplete attendance data can still be tracked.	**Scenario — No Attendance Information** Given the user has no check-in record And the user has no check-out record When the day ends Then the system shall save attendance status as: "No attendance information"	The system shall detect users who have not checked in before 3:00 PM. If the user has not checked in before 3:00 PM, the system shall send an evening reminder at 6:00 PM. If the user has no check-in record and no check-out record for the day, the system shall save the attendance status as: "No Attendance Information". The system shall validate attendance records automatically at the end of each working day.	

13	**US-14**	REPORTING & DASHBOARD	employee	to view my monthly attendance s	I can track my attendance performance.	[As a/an] employee, [I want] to view my monthly attendance summary, [so that] I can track my attendance performance.	**Scenario — View Attendance Dashboard** Given the user has attendance records When the user opens the dashboard screen Then the system shall display: - total working days - leave days - check-in/check-out history	The system shall provide a monthly attendance dashboard for each user.	
14	**US-15**	REPORTING & DASHBOARD	employee	the system to generate monthly attendance reports,	I can review my attendance history based on cutoff date.	[As a/an] employee, [I want] the system to generate monthly attendance reports, [so that] I can review my attendance history based on cutoff date.	**Scenario — Generate Monthly Report** Given the user configured a cutoff date When the monthly reporting period ends Then the system shall generate an attendance report And the report shall use the configured cutoff date	The monthly report calculation shall follow the cutoff date configured by the user.	
15	**US-16**	SETTINGS MANAGEMENT	employee	to configure my cutoff date,	my monthly attendance report matches my company policy.	[As a/an] employee, [I want] to configure my cutoff date, [so that] my monthly attendance report matches my company policy.	**Scenario — Update Cutoff Date** Given the user is on the settings screen When the user selects a new cutoff date Then the system shall save the cutoff date successfully And future reports shall use the updated cutoff date	Users shall be allowed to configure their monthly cutoff date.	
16	**US-17**	SETTINGS MANAGEMENT	employee	to customize reminder times,	the attendance reminder matches my working schedule.	[As a/an] employee, [I want] to customize reminder times, [so that] the attendance reminder matches my working schedule.	**Scenario — Update Reminder Time** Given the user is on the reminder settings screen When the user changes the morning reminder time Then the system shall save the new reminder schedule And future notifications shall follow the updated time	Users shall be allowed to configure reminder times in the settings module.
